

7 Cancer Breakthroughs That Could Save Your Life

By Julian Whitaker, M.D.

Here's what you'll discover in this article:

1. In Texas, a visionary doctor is curing, yes curing, patients with so-called "incurable" cancer.
2. The deep-sea extract that stunned doctors at Memorial Sloan-Kettering because it erased all signs of cancer.
3. The "enzymatic antidote" that made one man's inoperable cancer disappear.
4. The amazing mineral that causes cancer cells to "self-destruct" before they can spread.
5. The herbal antidote for breast cancer.
6. The real reason Asians get less cancer than we do.
7. How certain foods "deactivate" the hormones that promote tumors.

In a moment, I'll tell you all about these remarkable breakthroughs. But first, I want to tell you what does not work against cancer...and why. It's time someone busted some of the old "myths" about what works when treating cancer...and what doesn't.

Radiation And Chemotherapy Do More Harm Than Good

In 1998, the respected British medical journal *Lancet* published an article that shocked the cancer-treatment establishment (you know, the radiation and chemo lobby).

They revealed that precautionary radiation given to patients who had successful cancer surgery was not effective. In fact, those patients who received postsurgical radiation were 21% more likely to die than patients who received surgery alone.

Dr. Burzynski's radiation-free cancer therapy shrank Mary Jo Siegel's tumors and erased all signs of cancer. She has been cancer-free for eight years now.

Cancer Scam Alert:

Con artists and crooks have always found cancer victims to be easy prey. Every day, I read about a new "therapy" that promises life...and delivers nothing but disaster. That's why I'm especially careful when I review new cancer therapies. I have reviewed *hundreds* over the years, and I sincerely believe the 7 breakthroughs in this article are your best bet for beating cancer.

Why haven't you heard about these breakthroughs before? Because the cancer-treatment "establishment" wants you to believe that surgery, radiation, & chemo are your only effective therapies. Well, that's just not true. There *are* safer, better options for cancer. These are the options I would choose if I had cancer. I hope you'll consider them too.

Chemotherapy has a dismal track record too. According to an analysis published in *Current Cancer Research*, chemo is credited with remission in only 7% of cases, and prolonged survival in another 15%. It's utterly useless 80% of the time.

Let me ask you, could chemotherapy possibly be any worse? And we all know about the devastating and de-humanizing side effects these treatments can have.

This is especially bothersome to me because we now have such a potent, proven set of safe treatments for cancer. There's just no need to put patients through all this torture.

How To Magnify Your Immune System So Cancer Cells Don't Have A Chance

It's a simple fact that radiation and chemotherapy simply devastate your immune system...allowing the cancer cells to multiply freely. It's like tearing down a fortress' walls to make it safer!

You don't tear down the walls when you're battling a powerful enemy... you build them up so nothing can penetrate!

And that's exactly what these new breakthrough therapies can do for you. Let's start with a Texas clinic where many so-called "incurable" patients have been cured.

Cancer Breakthrough #1: The Cure We've Been Praying For?

When Mary Jo Siegel was diagnosed with advanced, low-grade non-Hodgkin's lymphoma, a fatal cancer for which there is no effective treatment, she went through the usual battery of medical "experts."

Their recommendation? A devastating dose of radiation and chemotherapy, followed by a bone-marrow transplant.

But Mary Jo decided to try another course of action. She chose a therapy being offered by a visionary doctor in Houston named Stanislaw Burzynski, M.D. Dr. Burzynski has isolated protein fragments which actually block cancer-promoting genes in your cells...and supercharge your anti-tumor genes.

Within three weeks of starting her therapy, her tumors began to disappear and, 12 months later, she was declared by her oncologist to be in full remission. It has now been eight years since her diagnosis, and Mary Jo is completely free of cancer. I recently spoke to her as she set off on a 10-mile hike in the Santa Monica mountains!

The most remarkable aspect of this therapy is

that it treats the *genetic cause* of cancer and works to actually normalize cell growth. Your healthy, normal cells are unaffected. And there are NO significant side effects.

In his recent presentation to the FDA, Dr. Burzynski presented the results of 74 *clinical trials using his therapy*. In one trial, Dr. Burzynski's therapy proved *seven times more effective than surgery, radiation, and chemotherapy*.

It is my personal opinion as an M.D. that Dr. Burzynski's therapy is the most promising cancer therapy I have ever seen. When "incurable" patients come to me, I send them to see Dr. Burzynski. If I had cancer, I would head straight to Texas...to Dr. Burzynski's clinic.

If you, or someone you love wants to contact Dr. Burzynski, I have put all the details you need (tele-

phone numbers, addresses, the works) in a new, free guide entitled *What I Would Do If I Had Cancer*. I urge you to send for your free copy today. Dr. Burzynski's therapy is just *one* of the remarkable cancer-fighting...and cancer-blocking therapies you'll find in your free guide. Just look...

Dr Burzynski's Cancer Therapy Proved to Be 7 Times More Effective than Radiation and Chemotherapy

Cancer Breakthrough #2 Complete Remission Stuns M.D.s At Memorial Sloan- Kettering

Not too long ago, a physician at the Cleveland Clinic and National Cancer Institute began a study of a remarkable deep-sea extract with 20 cancer patients.

One of those patients, an 84-year-old man with metastatic liver cancer, was completely cured in just eight weeks. At Memorial Sloan-Kettering, where the patients were evaluated, the medical staff had never seen such rapid remission.

In subsequent studies, this amazing extract has demonstrated success rate of 25% to as much as 50%.
