Subject: Mom

Hi Everyone: I have been in contact with Sanoviv - out of Baja California, Mexico - they are the medical centre from Usana

I have met a lot of the doctors when I went to Salt Lake City on September 15/04 for the Usana Convention. One of the Doctors - Dr. Kuomo had a presentation in Winnipeg and Michelle and Dustin heard his medical advice on staying healthy and About the centre at Sanoviv

*CALLER

ALREADY
IN 2006!*

I faxed the doctors all mom's information yesterday morning and had a telephone consult just now from 1:30 to 2:00 pm with

→ who says?

Doctor Daniel from Sanoviv - They are good friends with Dr. Burzynski and believe in his work - Dr. Burzynski sends some of

THE OTHER WAY AROUND!

His difficult patients to Sanoviv to help with the treatment. They recommended that Mom continue with the Amino Care (10 per day) and the Sodium Phenylbutyrate - (30 per day) for the time being and she went on to explain what they do at Sanoviv

She said and I quote "we have very good success with Specific Transfer Factor" procedure. They have only been doing this for about 3 years but what they do is they remove a piece of cancerous tissue. They grow the tissue in a lab ..they do outside the body trials to see what is the best remedy to kill the tumour. At the lab - healthy people donate blood - they take different antibodies from the healthy blood and keep testing the cancerous cells until they find the right antibody to fight the cells. When they find the right antibodies - they make vials of it and Mom would take it orally. Her own body would then start producing those antibodies to fight the cancer. She would start with

- OPERATION WHICH CAUSED BLOCKAGE IN MOM'S STOMACH.

5 Vials the first week, 4 the second and so on. She can come home with the vials no problem as many Canadians

Wheaty ras

Are being treated there. If I remember correctly, she said it may take 5 to 6 months for full treatment of the cancer. If a patient requires chemo - they again test the cancerous cells in a test tube with different types of chemo to see which type will kill the cancer cells so there is no risk of giving the patient the wrong chemo drug which of course would also kill her good cells.

GUINED PIGS.

What is funny is that the booking clerk's name is Michelle Despina from Edmonton and Her mom was treated for breast cancer about 10 years ago and is doing excellent. She had this procedure and they guaranteed her Mom that it would never come back. That was 10 years ago.

- Wrong 24RS A60-

Michelle so believes in Usana and Sanoviv that she has moved there and works for Usana Health Sciences/Sanoviv Clinic.

Already quit!

I asked the Doctor about Mom's sore back and she said the cancer tumour may be pressing nerves which connect to her back causing pain.

Get you facts straight

There is a companion room for Mom to bring a family member attached to Mom's room. She

↳ AT \$100 NIGHT REALLY? GHOASTIFIED SPA IS ALL THIS IS! IN MEXICO YET!
